## CUSTOM SOLUTIONS

At Allkind Joinery & Glass we make everything custom made to suit you and your home.

Backed by the extensive industry knowledge of our staff, we can work with you to ensure that every detail of your job surpasses your needs and expectations.

## NEW SHOWROOM

The new showroom at Allkind Joinery is really starting to take shape with a range of door and window solutions already in place, the Formica floating timber floor put down earlier in the week and a vast range of hardware on display.

We also have plans set in place with Hettich for the Showroom Kitchen which will show a vast range of innovative design and feature materials.

## History of Allkind Joinery & Glass

Allkind Joinery & Glass is one of the few remaining old fashioned timber joineries in Queensland. Our founders established Allkind Joinery in 1970 moving from Brooks Joinery and bringing with them a lifetime of experience in the industry.

Although over time Allkind has upgraded machinery to include some of the latest computerised machines, we faithfully maintain the traditional construction of full mortise and tenon, wedged and glued joints in all timber windows and doors. All products are hand crafted to ensure the highest quality.

Allkind Joinery is a registered builder (QBSA Licence 22196) and we certify that all glazing is carried out to Australian Standard AS1288-1994 Glass in Buildings – Selection and Installation. We are a member of Commerce Queensland, WADIC (Window and Door Industry Council) and Queensland Master Builders Association.

At Allkind, we take great pride in training our own apprentices to ensure that the in-house skills, developed over generations, are maintained. This also ensures the quality of our products. Our key staff members have been with us for over 25 years, testimony to the strength and skill level within Allkind Joinery.

## SHOWROOM OVERVIEW

We are currently in the process of building a brand new showroom which will display a large range of not only our products, but our suppliers products as well.

Our new showroom is really starting to come along. We currently have Bi-Fold Doors, Breezway Louvres, Sliding Stacking Doors and Centor Sliding Screen Doors on Display; with many more products yet to come.

The floating timber floor should be going down some time within the next week thanks to Formica.

We have set plans in place with Hettich for a showroom kitchen which will display some of the most innovative technology in new kitchen hardware including electric drawer systems and LED lighting throughout the cabinets.

Our Breezway louvres not only look good; they are a great way to get the air flowing through your home. You can choose from Timber louvres in Surian Cedar, Merbau or New Guinea Rosewood; or a range of different glasses. Your louvres can be framed in either aluminium or the timber species to match the louvre blades. We can have your Breezway louvres fitted with a security screen which will also stop the creepy crawlies getting in!

We have now got a range of hardware on display from affordable, quality Renovator Range products to the high end, top of the range Doric hardware.

Not only is timber a great way to merge your indoor outdoor living space, it also brings warmth into your home. So why not come in and check out some of the products we have on offer.

### MEET THE TEAM

Richard Travers

Richard began working at Allkind Joinery in 1981 as an apprentice cabinetmaker. After he became fully qualified, Richard worked both in Cabinetry and Joinery. Richard is now one of the Directors of Allkind Joinery, in charge of Sales, Marketing, Estimating and Administration.

Gerard Wilson

Gerard commenced with Allkind Joinery in 2003. Gerard is a licensed builder and has extensive experience in building and business management. Gerard is a Director of the Company and is responsible for manufacturing in the cabinet and joinery factories, contracts management, purchasing and

## Allkind Joinery Timber Doors Screened By Centor

Centor has solved the problem of screening large openings with their horizontal retractable screen system. They come in lengths up to 7.6m, retract to be hidden inside door frames and can be opened with just the touch of a finger.

S1E screens can be fitted with either insect screens or blinds to suit your needs. The frame can be powder coated in a range of colours to match existing screens throughout your home.

Centor Door Screens look great alongside a beautiful set of timber sliding stacking doors which come mainly in New Guinea Rosewood with a Merbau sill but can be customised to suit your individual taste.

Our sliding stacking doors are glazed with A grade safety class to meet Australian standards. The glass is fitted into a stylish 10mm stepped shoulder to smooth the transition between glass and timber.

### Standard hardware includes:

- Adjustable bottom rollers.
- Centor drop bolts.
- Flush pull handles recessed into door.
- Stainless steel roller guides to head to ensure doors roll freely even with a slight bow over time.

Sliding Doors, Bi-Fold Doors, Stacker Doors and French Doors by Allkind Joinery can be fitted with [Centor S1E screens](#) at time of manufacture or Retro fit after installation.

Not only are our timber sliders warm and inviting, they also make a great feature in your home.

## Allkind Joinery Bi-Fold Doors Moved By Centor

Here at **Allkind Joinery** we use only the highest quality timbers, sourced from a certified, sustainable sources to hand craft not only our timber bi-fold doors, but all of the products we make. The most common timber species we use are Merbau, New Guinea Rosewood (class 1) and Surian Cedar (class 2). Using class 1 durability timbers like these will ensure stability and longevity. These timbers are also low maintenance.

At Allkind Joinery we know that nothing is as important as the safety of your family. Centors bi-fold door hardware is completely secure through both innovative design and robust materials. The stainless steel fittings are mostly concealed, and any accessible hardware cannot be removed or tampered with. Our timber bi fold doors are fitted with A grade safety glass to meet AS288-2006, this will ensure that your family is kept safe.

Allkind Joinery custom makes all of our timber bi-folds, which means we can incorporate Centor Retractable Screens, Aneeta Sashless Windows and even Pet doors!

*“Centor exterior folding door systems allow you to connect and divide living areas, create vistas, bring in natural light and fresh air, and seamlessly join indoor and outdoor activities. Also known as bi-folds, the exterior doors stack to the sides and have no posts or fixed door panels to block views or breezes.”*

Centor is confident that their product offers reliable operation for longer than the 10 year warranty. Centor folding door systems also offer the unique feature of both horizontal and vertical adjustment. This compensates for building movement and out-of-alignment openings, allowing doors to operate smoothly even in imperfect conditions.
